QUESTION 1

The establishment of neighbourhood care points (NCPs) where orphans and vulnerable children are taken care of by care givers is a very important initiative for normal psychological development for various societies in Eswatini. It is here where the children are supposed to come and present their everyday life problems and also to get something to eat. Children are supposed to be cared for in a holistic manner involving all the essential organs of personality. However, this seem not to be happening in the NCPs. Children go there just for food, which, in most cases is also often not enough for every child. Discuss three stumbling blocks that retard the holistic provision of mental Health promotion services in the NCPs.

QUESTION 3

Suicide cases are increasing among the youth in Swaziland. Children that have both parents have been reported to have killed themselves either through taking poisonous substances or hanging by the rope. Many parents are worried about this because they do not know who could be next and why. In your own opinion, discuss three possible causes of suicide among children who are not orphans. Label these causes a, b and c respectively. The (a) and (b) causes are 10 marks each and cause (c) 5 marks.
