Question 2

a) The following data illustrate the post-position suffix hu ‘in’ in Mende, a language spoken in both Liberia and Sierra Leone. Notice in the data that the suffix bears tone, but the tone varies on different words.

‘in’

(i) kpá ‘debt’ kpáhú
(ii) mbá ‘rice’ mbáhú
(iii) mbá ‘companion’ mbáhú
(iv) ndávúlá ‘sling’ ndávúláhú
(v) felámá ‘junction’ felámáhú
(vi) níkílì ‘groundnut’ níkílíhú

In the examples tones are indicated as follows:

á = high
à = low
ã = falling
ã = rising

Task

Account for the differences in tone on the suffix for ‘in’ in Mende. State your solution with autosegmental notation. (Hint: Assume that the suffix has no tone to begin with, but that the word to which it is attached does have tone). Support your argument by analysing examples (i), (ii), (iv), and (vi). (12 marks)

b) Write the following words in phonetic notation and place the words in their syllables:

i) syllabify
ii) naughty
(iii) job
(iv) article
(v) motivation (10 marks)
c) Discuss *tone melody* as used in tonal analysis. (3 marks) [25 marks]
