

UNIVERSITY OF SWAZILAND

FINAL EXAMINATION PAPER

Title of Paper: Project Evaluation

Course Code: Econ 305

Time Allowed: Three (3) Hours

Instructions:

1. Answer Four (4) Questions. Two From Section A and Two from Section B
2. All Questions Carry Equal Marks of 25 Each.
3. The Relevant Annuity Tables are supplied

Do Not Open This Question Paper Until The Invigilator has Granted Permission.

SECTION A

Question 1

- a) What arguments would you advance against the suggestion that the government should be risk neutral when considering investments? [10 marks]
- b) Outline the Arrow-Lind theory on risk spreading? [8 marks]
- c) What criticisms are advanced against the Arrow-Lind theory on risk spreading? [7 marks]

Question 2

- a) On the basis of its characteristics, define a project. [7 marks]
- b) Outline the steps involved in a project life cycle. [8 marks]
- c) What are the sources of information on possible projects, and what information is required for project identification? [10 marks]

Question 3

Write explanatory notes on any five of the following

- a) Hicks- Kaldor compensation variation principle
- b) Advantages of the payback period method
- c) Problems associated with the Internal Rate of Return
- d) Scitovsky's paradox
- e) Scenario Planning
- f) Formative and Summative evaluation
- g) Unilateral and reciprocal externality

[5 marks each]

Question 4

a) Why are undiscounted measures of project worth considered deficient in informing project appraisal and selection? [5 marks]

b) Cobb-Web Investments is considering making an investment which has the following cash flows:

<u>Year</u>	<u>Casflow (E)</u>
0	(9120)
1	1000
2	5000
3	10000

You have decided to use the net present value approach to ascertain the desirability of the investment. You have also been informed that the company's cost of capital is 10%

i) is the investment viable? Show your workings clearly. [8 marks]

ii) How much in excess of the indicated cost of the investment could the company afford to pay for the investment and be no worse off financially? [4 marks]

c) A company is interested in an investment which would require a capital outlay of E6000 immediately and is expected to produce net cash inflows of E15 000 a year for the first four years and E3000 in the fifth year. Also assume that the management of the company has an 8% acceptable rate of return investment criteria. Would you advise the company to invest in the project? [8 marks]

SECTION B

Question 5

a) Briefly describe four adjustments to market prices that are necessary to derive social values. [4 marks]

b) "More often than not, market prices do not reflect the true scarcity values or marginal productivity of resources. Therefore, one can conclude

that market prices are useless” Do you agree with this statement? Why or why not? [4 marks]

c) “If total benefits to whomsoever they accrue exceed, by some suitable margin, total costs upon whomsoever they fall, then a project is deemed worthwhile”. What two basic objections would you forward against this philosophy? [5 marks]

d) Explain the “Scitovsky Paradox”. [4 marks]

e) Explain four possible justifications for disregarding distribution effects of costs and benefits in project appraisal. [8 marks]

Question 6

a) What are the major aims of evaluation? [5 marks]

b) What is the Critical Path Method (CPM)? Outline the major steps involved in the construction of a network diagram [10 marks]

c) Consider a project for an integrated computer program that constitutes the following activities, their precedence, and their completion times:

ACTIVITY	DESCRIPTION	REQUIRED PREDECESSOR	DURATION
A	Product Design	none	5 months
B	Market Research	none	1
C	Product Analysis	A	2
D	Product Model	A	3
E	Sales Brochure	A	2
F	Cost Analysis	C	3
G	Product Testing	D	4
H	Sales Training	B, E	2
I	Pricing	H	1
J	Project Report	F, G, I	1

Construct the network diagram for this project. Identify all possible paths and indicate the critical path and its duration. [10 marks]

Question 7

- a) One way of incorporating risk in project analysis is through sensitivity analysis. Explain the concept, outlining clearly how it is applied. [8 marks]
- b) Discuss any four areas to which projects are normally sensitive. [8 marks]
- c) What are the weaknesses of this technique? [4 marks]
- d) Would sensitivity analysis guide decision making with regard to acceptability or otherwise of a project? explain. [5 marks]

Question 8

- a) Compare and contrast the approach of UNIDO with that of OECD approach to project evaluation in developing economies. [12 marks]
- b) Describe the four methods of valuing life and health which E.J Mishan considers objectionable and inappropriate. Indicate grounds on which each method is deemed inappropriate. [13 marks]

TABLES

Table I
Compound Interest Table
 $Y = (1 + i)^n$

Amount at End of Year	Interest Rate						
	1%	4%	4.5%	5%	6%	8%	10%
